

<b>CONDITION</b>	<b>Benefit from CoolStance</b>	<b>Reason Why CoolStance works</b>
<i>Weight gain</i>	Improved top line and body condition	DE from oil and digestible fiber
<i>Temperament</i>	Sensible behavior for the rider and handler	Low NSC and cool energy from the oil
<i>Performance</i>	Provides energy for controlled, sensible performance	Low NSC and cool energy from the oil Replaces grain based, high NSC feeds
<i>Coat</i>	Healthy and brilliant coat from inside out	Oil for shine Amino acids methionine and cysteine for hair growth
<i>Mane and tail</i>	Healthy and brilliant mane and tail	Oil for shine Amino acids methionine and cysteine for hair growth
<i>Water intake</i>	Maintains water intake	Add CoolStance to water, to entice horses to drink.
<i>Insulin resistance</i> <i>Obesity</i> <i>EMS</i>	Reduces circulating glucose, and reduces propensity for obesity	Low NSC reduces circulating glucose Lauric and caprylic acids (MCT) prevent overgrowth of intestinal organisms and leaky gut syndrome
<i>Acidosis</i>	Reduces carbohydrate overload into the intestines	Low NSC (starch less than 2%) so that there is no carbohydrate overload to the hindgut
<i>Laminitis</i>	Reduces lameness and laminitis  Improves hoof repair	Low NSC reduces carbohydrate overload, and hindgut acidosis Low NSC reduces insulin resistance MCT prevents overgrowth of intestinal organisms, leaky gut syndrome and insulin resistance
<i>Hoof condition</i>	Balanced hoof growth rate, less trimming Tighter connection around the pedal bone Improved hoof wall Improved moisture holding.	Oil improves moisture retention barrier in the hoof Amino acids methionine and cysteine for keratin formation MCT effect on bacteria that cause white line disease
<i>Cushings</i>	Reduces effects of laminitis	Low NSC reduces the effects of laminitis which occurs in Cushings horses.

For more information or to order CoolStance/PowerStance, please call 803-647-1200 or e-mail [Claudia@stanceglobal.com](mailto:Claudia@stanceglobal.com)

<i>White line disease, seedy toe</i>	Eliminates the condition	The MCT prevents growth of the harmful bacteria and fungi that cause the hoof wall to separate from the laminae in the hoof under the anaerobic conditions in the hoof.
<i>Greasy heel, Scratches, mud fever, rain scald.</i>	Eliminates the condition	The MCT in the oil prevents the growth of the fungi and bacteria that cause these infections on the skin surface
<i>Tying up, Azoturia, Monday Morning Sickness PSSM</i>	Avoids tying up and muscle cramps	Low NSC avoids glucose and polysaccharide storage in the muscle cells Oil provides cool energy for performance
<i>Ulcers</i>	Avoids stomach ulceration	Low NSC reduces digestible carbohydrate load on the stomach Glutamic acid reported to reduce ulcers
<i>Colic</i>	Avoids intestinal colic	Low NSC MCT prevents overgrowth of intestinal organisms and leaky gut syndrome
<i>Hard keeper</i>	Improves body condition	Palatable DE from oil and digestible fiber
<i>Easy keeper</i>	Provides energy without increasing body weight	Feed only small amounts, low NSC feed.
<i>Yearlings</i>	Increased live weight gain	Provides DE from the oil and digestible fiber. Provide minerals and balance lysine
<i>Mares</i>	Increased milk production	Provides DE for oil and digestible fiber. Provide balanced minerals.
